Practice Questions

Set 5

A. Answer the following in 40-50 words:

1. In what way does the poem *Dust of Snow* suggest that even negative elements of life can lead to positive outcomes?
2. How does the poet humourously describe the method of identifying crocodiles? Why is it difficult to spot a chameleon?
3. How does the imagery in the poem convey the transient and elusive nature of fog?
4. What does Anne contemplate to find true love? Do you think her action would be fruitful?
5. "Extraordinary affair!" the clergyman kept saying for the rest of the day - comment on the extraordinary affair that the clergyman refers to.
6. What pioneering theory did Ebright come up with? How could it be useful to medical science?

B. Answer the following in 100-120 words:

Griffin and Richard Ebright are both great scientists. Write a conversation between the two highlighting the differences in their perception of success in the field of scientific inventions.
